NET Surgeries in the Pancreas

**Enucleation**
Removes ONLY the tumor itself

- Pancreas
- Tumor
- Pancreatic Duct
- Clip vessels on tumor
- Shelling out of tumor

**Distal Pancreatectomy**
Removes the tail and/or body of the pancreas (and sometimes also the spleen with lymph nodes)

- Aorta
- Gallbladder
- Bile Duct
- Duodenum
- Inferior vena cava
- Spleen
- Pancreas
- Tumor

**Pancreatoduodenectomy** ("Whipple Procedure")
Removes the head of the pancreas, the gallbladder, nearby lymph nodes, and parts of the stomach, small intestine, and bile duct. The remaining parts of these organs are then reconnected in a new way.
