

DEDICATED TO CURING NEUROENDOCRINE CANCER

The Neuroendocrine Tumor Research Foundation (NETRF) is the largest private funder of neuroendocrine tumor (NET) research. We are dedicated to funding research to discover cures and more effective treatments for neuroendocrine cancers. NETRF also works to improve the lives of patients, caregivers, and families living with neuroendocrine tumors by providing them with resources to educate and empower them in their journey.

AN UNCOMMON AND UNDERFUNDED CANCER

NETs are a rare cancer that can form in many different organs of the body.

NET research receives only **one-tenth of one percent** of government-funded grants, and is **underfunded over five-fold** based on its prevalence in the U.S. NETRF helps bridge this gap by funding nearly **30%** of all NET research. By supporting 2.5 times more NET investigators than any other funder, NETRF has established a vibrant scientific community dedicated to understanding NETs and its treatment.
