

# Breakthrough Research Roadmap to Cures

Goal: \$25 Million by 2030

## BUILD THE RESEARCHER PIPELINE

Funding and nurturing the next generation of neuroendocrine cancer researchers.

## UNLOCK NEUROENDOCRINE CANCER

Cast the Wide Net: Investing in the underlying science of neuroendocrine cancer - so we can treat it.

## NEW INNOVATIVE TREATMENTS

Exploring new drug targets and improving existing therapies.

- Therapeutic Development & Resistance
- Immunotherapy
- Radioligand Therapies
- Tumor Microenvironment
- Experimental Models

## EARLY DETECTION

Detecting neuroendocrine cancer at its earliest stage.

- Early Detection Methods (Biomarkers, AI)
- Disease Epidemiology

## PRECISION MEDICINE

Delivering the right treatment to the right patient.

- Molecular & Genetic Understanding
- Biomarkers
- Hereditary NENs & Rare Subtypes

## CURES
