Dynamic Delivery in Scientific Communication

A free webinar for researchers, presented by NETRF and Terry Gipson
February 11th, 2026, from 11:00 a.m. - 12:00 p.m. ET

Effective communication helps scientists share their work and increase their impact.

Join this interactive session to learn practical tips for speaking confidently about your research—whether you're presenting at a scientific conference or talking with funders. Inform, inspire, and influence your audience.

- Learn how to use vocal variety (pitch, rate, volume, pauses, and speech fillers) alongside nonverbal techniques such as facial expression, eye contact, gesture, body language, and movement.
- Develop strategies to reduce performance anxiety and build credibility.
- Command audience attention in both small and large group settings!

Meet Terry Gipson

Webinar presenter Terry Gipson is a public speaking teacher and consultant dedicated to helping scientists and physicians communicate their work with clarity and impact. At Harvard Medical School, he contributes to the Global Clinical Scholars Research Training program, guiding researchers worldwide in effective scientific presentation and delivery. Terry teaches courses in public speaking, strategic communication for scientists, and public relations at Harvard College. He also served as an editor for the Effective Writing for Health Care program at Harvard Medical School. Before entering academia, Terry built a 25-year career in communications, public relations, and media.
